

Open source add-on to improve the quality of your website.

desktop.opquast.com/en/

Opquast Desktop is a Open source Firefox addon that launches more than 500 tests (UX, SEO, accessibility, performance...) on the webpages you're currently browsing or coding.

Opquast Desktop tests your web page and displays the results. You can locate the errors on the page and correct them. Here are some of the available checklists:

- [Opquast UX](#) (65 tests)
- [Opquast SEO](#) (31 tests)
- [Opquast Webperf](#) (23 tests)
- [OpenData Dataset quality](#) (12 tests)
- [Accessibility First step : error detection](#) (80 tests)
- [Accessibility second step : risk management](#) (42 tests)

EXPORT YOUR RESULTS

You can directly export your tests once they're completed:

- **CSV:** your tests results can be saved and opened with most spreadsheet software or handled by your own tools.
- You can export your tests to Opquast reporting (<http://reporting.opquast.com/en/>), our web governance tool.

OUR SERVICES

Temesis develops **your own opquast desktop version with your own specific tests.** You're able to distribute your own add-on to your partners and developers. Everyone can check the developments.

The results generated by Opquast desktop can be exported into the opquast reporting SaaS tool. This tool can automatically **generate reports and barometers.**

Opquast desktop can be driven by Selenium IDE. With this selenium companion, you can use Opquast desktop to **check websites during your functional tests.**

Since 2000, Temesis produces expertise and software to improve the quality and accessibility of your websites.

WEB QUALITY AND ACCESSIBILITY EXPERTS

Web accessibility refers to the inclusive practice of making websites usable by people of all abilities and disabilities. When sites are correctly designed, developed and edited, all users can have equal access to information and functionality (*). Web accessibility improves SEO and prevents legal risks.

* Wikipedia/ Web accessibility

Web quality addresses the website in its whole entity aiming the satisfaction of its users. The website gets easier to find and to use. Web quality leads to improve the quality of the contents and services. The website gets more robust, performant and securized. Web quality decreases the non quality costs and improves the conversion rate..
